Adjusting a Stromberg carburettor | How a Car Works

The Stromberg CD carburettor, like the SU (See Adjusting an SU carburettor), is a constant-depression carburettor, hence the CD. The size and type of a Stromberg are given by numbers and letters. Numbers such as 125, 150 and 175 are sizes: they mean a choke diameter of 1 1/4, 1 1/2 and 1 3/4 in. The ...

How to overhaul a Stromberg carburettor | How a Car Works

The Stromberg carburettor does not have a regular service schedule, but should be cleaned about once a year. Replace worn parts as necessary. Dirt which has penetrated the fuel filter, and residues from chemicals in petrol build up inside. Needles and jets wear out after a few years' use. Remove the ...

Stromberg Carburetor Numerical Index

Stromberg Carburetor Numerical Index. Stromberg carburetor numbers were sometimes found on tags, but were usually stamped - faintly - into the float bowl cover area. Some series of numbers were cast into the throttle body. Interpreting Stromberg Carburetor Numbers

Zenith Stromberg Carburettor Repair Guide

Read this Zenith Stromberg Carburetor Repair Guide to solve the problem. ... I have a stock 79 mgb with a single 175 CD5T Zenith Stromberg with manual choke. The automatic choke and some pollution parts were removed by previous owner, such as air pump, air pump cleaner and check valve. The gulp valve is in place but not plugged.

Bendix

Of the three types of carburetors used on large, high-performance aircraft engines manufactured in the United States during World War II, the Bendix-Stromberg pressure carburetor was the one most commonly found. The other two carburetor types were manufactured by Chandler Groves (later Holley Carburetor Company) and Chandler Evans Control Systems (CECO).
